

Maintenance instructions

for electronic locking cylinders, door handles and door fittings

Please follow these cleaning and maintenance instructions so that you can enjoy our products for a long time:

Recommendation for cleaning

- Clean the products with a soft, slightly damp cloth.
- Dry the products using a soft cloth if necessary.

Cleaning agents

- Use only pH-neutral cleaning agents and water.
- Do not apply the cleaning agent directly to the products, but apply it to a damp cloth.
- Do not use any cleaning agents containing chlorine or acid, as well as caustic, abrasive or scouring cleaning agents as these can damage the surface.
- Do not use cleaning agents containing propyl alcohol (1-propanol, 2-propanol/isopropyl alcohol). Those can damage the printing of the logodiscs.
- Use disinfectants only on metal surfaces and use them as per the cleaning recommendation.

General information

- Also note the specific instructions given in the operating and assembly instructions for the respective products.
- If the products are used in an environment where they are regularly exposed to large amount of dirt and liquid, please use the weather-proof product variants (IP66) for indoors as well.
- If you receive new sealing rings as part of an accessory order, then please replace them in the respective product.
- Do not use steam equipment for cleaning.
