## Electronic Door Handle and Door Fitting

## Door Handle and Door Fitting

The electronic Door Handle **CX6172/CX2172** and Door Fitting **CX6174/CX2174** can be installed in virtually all commercially available doors and electronically control the access to the doors.

The stainless steel design is timelessly modern and fits into any interiors. The installation is possible without wiring or special tools.

### Your highlights at a glance:

- Easy assembly and retrofitting (existing DIN holes can generally be used)
- Intuitive operation thanks to clear LED signaling
- Certified for fire and smoke resistant doors as well as for emergency exit locks
- Offline and online operation via radio network
- Choice of different versions and handle shapes
- Optionally with round or oval rose
- Optionally with wide plate, narrow plate or short plate
- Logo disk with vendor logo possible

## Combination options

The doors can be fitted with electronic access right on one side, for example for office doors, or with electronic access right on both sides (except fitting with short plate), for example for pass-through doors.

The following table provides an overview of the various combination options for inner and outer door side **with electronic access right on one side**:
